CORE COMPETENCIES

ecoPreserve helps organizations navigate the transition to electric vehicles through our vehicle electrification feasibility study, charging infrastructure analysis, operations evaluation, and EV rollout planning.

- Transportation needs assessment, financing options, capacity for on-site generation and storage.
- Policy forecasting and analysis for plan development. Coordinated utility rate analysis and managed charging through software and operations to minimize electricity costs. Grant writing, RFP development, bid evaluations, electric utility interface, and rate selection.
- Holistic Electric Vehicle charging infrastructure deployment and management
- Location EVCI viability scoring.

DIFFERENTIATORS

- ecoPreserve programs support economic viability, operational resilience, natural resource conservation, and positive social impact.
- We use data trending and analysis for decision making and
- have insight into innovative service delivery options.
- Highly skilled team of credentialed professionals (PhD, PE, AIA, CIH, PMP, LEED AP, SFP)

EXPERIENCE

Orlando Utility Commission (OUC)

- Grant application and management, EV charging program development, business case development

Orange County Convention Center

- Fleet assessment, EV transition planning

First Key Homes

- EV feasibility study, business case development
